LIGHTING CATALOGUE

Lighting Catalogue

Everything started with a dream. Our dream in those years, when we stepped into lighting industry, was to let as many people have proper and quality light in the fastest way as possible both in our country and the world.

We have provided more efficient and safer lighting fixtures. In consideration of the rules of the science of lighting, we brought together our customers, suppliers and teammates at the same denominator we work together with continuous improvement target, thanks to close relationships with the universities; we ensured the scientific support for the industry. We tried to raise awareness thereby conveying the importance of lighting to young engineers.

We accelerated our infrastructure works with R&D projects together with the arrival

of new technology, LED. We blended electronics with our experience and knowledge of lighting. This catalogue where you can find all your lighting needs together the endeavours of all our engineers and other employees set their hearts on the subject of lighting which became multidisciplinary thanks to project designing and moulding-measuring-flexible production structure beyond those luminaires.

11 years experience in lighting industry

Thanks to the experience gained in lighting industry over 11 years, We combine the innovations of LED technology thereby taking accurate steps. We deliver you smooth results with the products we created with new light sources, thanks to the power and safety our brand provides.

R&D

We direct our R&D studies, in accordance with the very fast-developing LED technology. We offer the best accurate designs for your projects, in the best manner suitable to lighting criteria. We are designing luminaires in compliance with LED light source and share the results with you therewith the measurements special to LED.

Design

As producers of lighting luminaires, we constantly work in order to raise design awareness in all our stake holders. We are able to carry out mechanical, optical, electrical and thermal designs within ourselves and we derive profit for our country and users, especially with energy-efficiency studies.

Measurement

We can carry out measurements via instruments peculiar to LED in our laboratory renewed with new LED technology. We are quickly reaching the targeted lighting criteria thanks to this laboratory to be accredited at the end of the year, and bringing you together with accurate lighting.

System and Quality Certificates

Since 2005, we have been making production within the framework of total quality with ISO 9001 Quality Certificate. We are putting the luminaires in service which you can safely use with the documents of certified testing institutions.

Flexible Production Structure

We act in line with your requirements and make our production special to you from reflector to refractor, from length to depth and from paint to components..

Large Product Range

We offer a unique address for all your requirements about lighting, and create time for you thereby reducing the number of operations thanks to a product range of over 7 categories

Total Saving Concept

LED light source is economical, long-lasting and efficient....,but as producers of luminaires, what we claim is that only light source is not adequate for real saving. You can only ensure real saving, when you deal with the conditions of illuminated ambient and the design of luminaires together with the source of light.. In **Costo**, we firstly determine your need, analyse right place and terms of use, support the propest light source with sensors and automation products that can be used in the setting, and ensure that you reach real saving rates thanks to luminaires we produced with efficient reflectors and diffusers.

Project Designing

We provide free of charge project support for your lighting projects with our designers and team of engineers. We offer the most accurate solutions for your place, thereby ensuring that you save thanks to the studies of our specially trained colleagues for energy efficiency.
